

## Disinfecting Cap

**Twists on easily and stays  
securely in place on commonly  
used needleless connectors.**

Protects ports for up to 7 days if not removed.

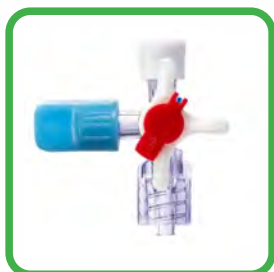

**All patients,  
all access points,  
all the time**

### Disinfecting Cap

Use only on needleless connectors.  
Do not use on open female luer.

1. Choose 70% isopropyl alcohol or 75% alcohol sponge for continuous disinfection protection and more thorough disinfection.
2. Reduce the incidence of catheter-related bloodstream infection (CRBSI) and effectively save medical expenses.
3. It can be connected with needle less connector, with better applicability.
4. Simple and convenient operation to improve work efficiency.
5. Independent small package, in line with hospital aseptic technical operation specifications.
6. For single-use only.
