Baby Nasal Irrigator

Description:

- ♦ **BETTER BREATHING:** Our nasal irrigator can be used to clean and care for children's nasal cavities, flush blocked nasal cavities with runny water, and for nasal caring and cleaning for occupational inhalation of dust to help children breathe better. **BABY NOSE PRODUCTS:** Nasal irrigator can clean the nose deeply without water accumulation. Controllable pressure, uniform water flows, and syringe design to avoid pressure imbalance.
- ♦ **EASY TO USE:** After cleaning just screw back the nasal suction tip to reuse. The silicone nasal suction tip and 10ml portable irrigator make it easier to suck nasal mucus from the baby's nasal cavity.
- ♦ **SAFE AND HIGH QUALITY:** The nasal irrigator uses non-toxic and odorless high-quality silicone nasal suction tips and environmentally friendly plastic irrigator cartridges, which are absolutely safe for babies and can be used safely by children.
- ♦ **SOOTHING NOSE RINSE:** No burning, no tingling, no drowning! The water in the nasal washing device flows gently through the nostrils, and the water flows evenly, soothing and smoothing the children's nasal cavity.

KDL's nasal irrigator is the only device that complies with 2017/745 MDR
